FBN is a premier residential building and remodeling firm serving Greater Boston since 1978. They are most proud of their ability to listen and collaborate with clients and their design partners to ensure their vision becomes reality, from overall concept down to every last detail.

FBN recently completed a multi-million-dollar renovation of a penthouse suite in the residences at the Four Seasons, One Dalton location. This project involved the fabrication and installation of hand rubbed piano finish book matched hardwood paneling and custom fabricated tile flooring imported from Italy.

Their relationships and experience allow them to help assemble an effective and appropriate team of Design Professionals. Working hand in hand with these assembled teams, they are able to facilitate a streamlined “design/build” approach

allowing the client to manage their budget and schedule to their satisfaction.

Through her involvement in IFDA, Larissa and current programmer, Lorelle Carlson are engaging design and industry partners with a rigorous programming schedule consisting of charity, educational and networking events, including a Diamond Awards Gala to be held at the Park Plaza in September.

At FBN their biggest achievement is the open and transparent construction management process and most importantly, their people. We have been successful in creating a company with individuals who really care about their work and always have in mind the best interest of their clients. When you have a company that genuinely cares about quality, their clients, and industry partners, you have a recipe for success.
